WHOLESALE PRICE LIST

1954-55

Aerial View of Seabrook Farms
Frozen Food Processing Plant

Known widely to nurserymen for the excellence of its ornamental shrubbery, Koster Nursery also enjoys distinction as a junior partner of Seabrook Farms, the largest vegetable-producing unit in the country. Koster Nursery was founded by Peter Koster in 1919. Its acquisition by C. F. Seabrook, Chairman of the Board of Seabrook Farms Co., was a natural move for the man whose love of fine nursery stock is reflected in the exquisitely landscaped grounds at his own home.

Many unusual advantages accrue to Koster through this association with Seabrook Farms. The assistance of a staff of agricultural experts, with vast experience in many fields, is available in the development of practices and procedures. The same direction through which Seabrook Farms has grown to a preeminent position in the frozen food industry has guided Koster Nursery along its path of expansion.

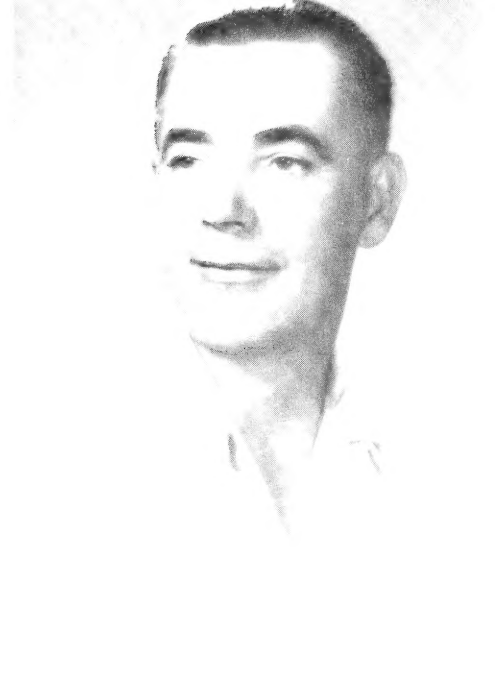

C. F. Seabrook
President and Founder

The growth of Koster Nursery has paralleled that of Seabrook Farms which has been developed by its founder into the world's largest vegetable farm integrated with the world's largest freezing plant. In the production of nursery stock, as in the growing and quick-freezing of vegetables (10% of the U. S. pack), there will continue to be given the same careful attention demanded for the production of fine quality products.

Dear Friends in the trade:

Again we are offering our new catalog to the trade. Since it is a medium to make contact with our customers, and friends, we want to thank those whom we consider Koster customers for the pleasant dealings we have had with them in the past.

Our Nursery is an old nursery and has gone through many phases. At the present time, once again we are going over from an experimental stage into an actual nursery, growing plants strictly for the trade. Through our experiments we feel that we have learned a good deal, and now we shall try to make use of our knowledge to give our customers better plants and also the good service that goes with it.

When glancing through this catalog may we suggest that you pay particular attention to the following fine offers.

HARDY JAPANESE AZALEAS.

After many years of experimenting on azaleas, this year we have paused to evaluate our findings. We have witnessed several mild winters in succession, making it very hard to decide exactly which varieties would stand the test of a severe winter. Last winter told us a fairly good story. Some varieties that we considered quite hardy before, proved to be softer than what we had anticipated. Many varieties, however, which had suffered as young plants, were found to be surprisingly hardier as older plants. This is very true in cases where certain varieties grow more rapidly during the summer, and do not turn to a dormant stage in time to withstand severe coldness. On account of this you will find that we have discontinued quite a number of varieties, not because they are not as hardy as older plants, but because we have found it impossible to grow younger plants at a profit. You will find that we are growing the varieties that we have kept, in ever increasing production, and hope to eventually pass on to you a saving in prices.

You will find this year that all of our azaleas have been pinched back to make nice compact plants. We have also continued the use of Sequestrene of Iron on these plants to induce the deep rich green color that all azaleas should have, and we are continuing to bed them for the winter in our deep frames. In order to have good quality plants, we give them all the care they need.

BUXUS SUFFRUTICOSA (Old English Boxwood)

Once again, by continuing our policy of increasing production, we have been able to offer you a substantial reduction in prices of some very fine material.

OWN ROOT HYBRID RHODODENDRONS

We believe that we are the largest growers of own root rhododendrons on the East Coast. From our experimentation, we have found this type of propagation produces a healthier and better branched plant which will remain true to variety. Our red rhododendrons are still quite limited in supply, but we are strenuously striving towards a solution of this shortage that has existed for the past several years.

In closing, let us say that we are not only intensely interested, but are acutely alert to the merchandising side of this business of ours. We realize today that we have to be more than a fine grower of nursery material, since we have to put as much eye appeal as possible into the plant delivered. Consequently, we are continuing to supply uniform plants, neatly balled and burlapped, also properly tagged. We are experimenting on some new ideas to further dress up a burlap plant and would welcome any suggestion our retail customers would care to offer. For the convenience of our customers, we have listed all of our liners on a special lining-out page. We recommend them to you for size and fine root system. Azalea liners are carried on along with our B&B material.

We sincerely hope that you will find in this brochure the things you need, and please do not hesitate to call or visit our nursery at any time. We will be most happy to assist you.

Finally, we have a very pleasant sales representative whom you may contact if you desire him to call upon you.

Sincerely yours,

KOSTER NURSERY

12-15" 2 yr. Own root. B&B	250.00

ROSEUM ELEGANS. XXX. H-1 plus.

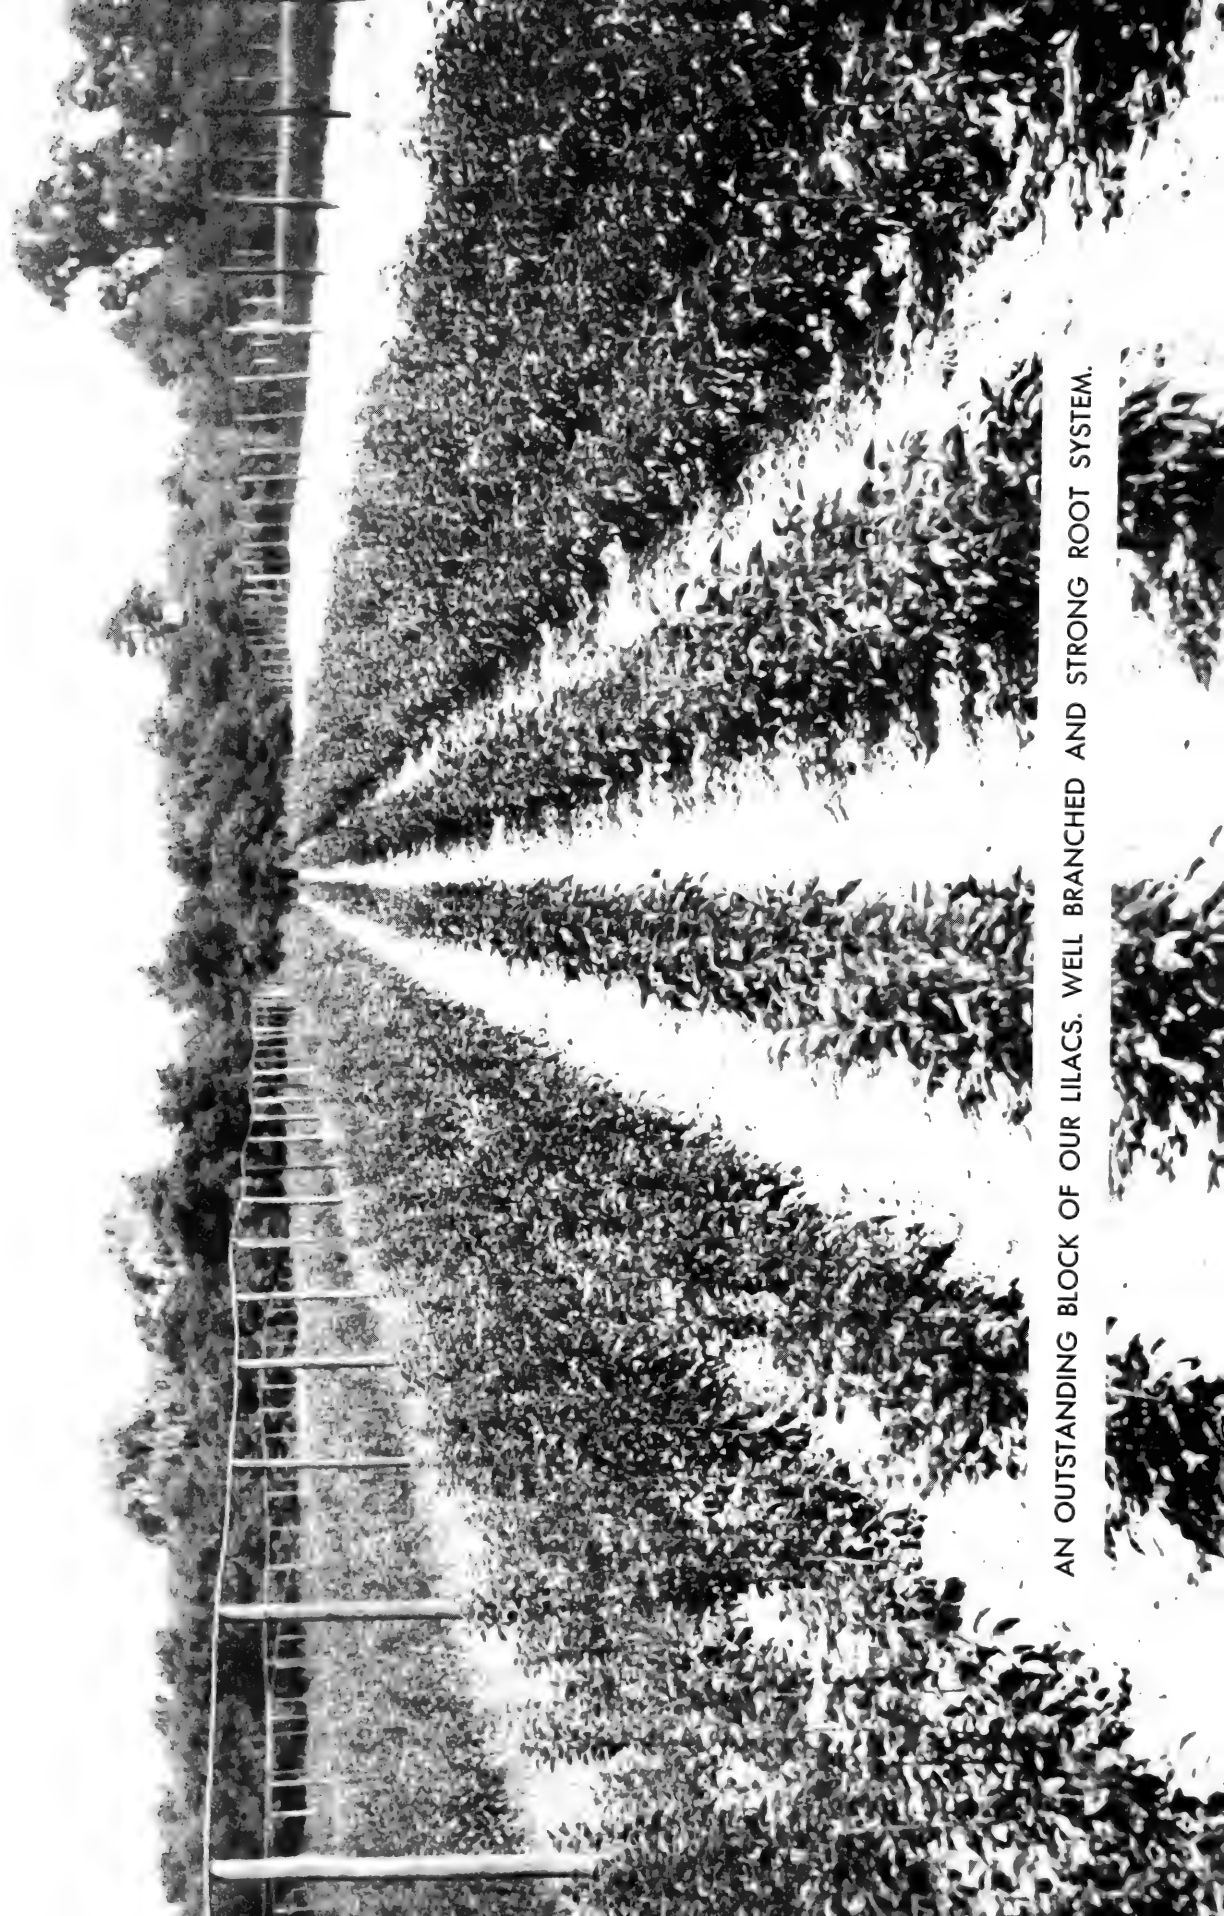

Color MALLOW PURPLE

The demand for own root Roseum Elegans increases far beyond our capacity to produce. On account of its bushy compact habit of growth and deep green foliage, it still continues to be the most popular of all of our rhododendrons.

10-12" 2 yr. Own root. B&B	200.00
12-15" 2 yr. Own root. B&B	225.00
15-18" 3 yr. Own root. B&B	275.00
18-24" 4 yr. Own root. B&B	400.00
2-2½' 4 yr. Own root. B&B	600.00

HYBRID FRENCH LILACS

AN OUTSTANDING BLOCK OF OUR LILACS. WELL BRANCHED AND STRONG ROOT SYSTEM.

SYRINGA

HYBRID FRENCH LILACS

This year we would like for you to consider our 18-24" B&B material. These plants have been placed in 4' x 4' rows and are especially bushy. We cannot recommend them too highly. At the same time you will see that we have eliminated our 12-18", BR grade, but have inserted a grade of 15-24" BR, which you will find is reasonably priced and will make satisfactory potted plants for your cash and carry sales.

TAXUS

A GROUP OF OUR WELL KNOWN YEW.

TAXUS

Heavy shearing, adequate feeding, and liberal grading have brought us many pleased customers. Also since all of the Taxus have either been root pruned or transplanted, you will find that losses in our plants are practically negligible. Although our supply is as strong as last year, our demand has more than doubled. If we cannot fill your entire yew requirements this year, please bear with us, since we have many fine young blocks growing for your future needs.

15-18" B&B	350.00
18-21" B&B	500.00

T. BREVIFOLIA TYPE.

You will note that we have changed the name of this very fine Taxus. The plants are very dense and compact in form, and will be graded as they have been in the past. It should not be confused, however, with the TRUE Brevifolia, since it is a stronger growing plant.

12-15" B&B	275.00
15-18" B&B	350.00
18-24" B&B	575.00

2½-3' B&B	600.00

T. MEDIA HICKSI.

Here is a fast moving item for the cash and carry trade, particularly in the smaller sizes. By popular demand we have been requested to shear the plants early in the season and then leave the remainder of the new growth on the plant. What you will receive is a full bodied plant in the sizes as specified, with an additional 6 to 8 inches in new growth on the top.

12-15" B&B	175.00

18-24" B&B	275.00
2-2½' B&B	400.00
2½-3' B&B	575.00

T. HUNNEWELLIANA.

This variety is quite rapidly supplanting T. Cuspidata in popularity. One of its greatest advantages is that it can be used either as a spreader or as a medium upright plant.

12-15" B&B	250.00
15-18" B&B	300.00
18-24" B&B	400.00

THUJA (ARBORVITAE)

Our stocks of American Arborvitae are excellent plants and have been heavily sheared and are well finished.

T. OCC. NIGRA.

Our offering of this variety last year was very well received. You will find that the color is much darker which causes a popular demand.

	Per 100
15-18" B&B	\$175.00
18-24" B&B	200.00

TERMS AND CONDITIONS OF SALE

ALL PRICES ARE F. O. B. KOSTER NURSERY, BRIDGETON, N. J.

We give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any nursery stock we sell and *we will not be in any way responsible for the crop*. If purchaser does not accept goods on these conditions, they are to be returned at once.

**WE ASSUME NO LIABILITY FOR DELAY OR FAILURE IN FILLING ORDERS,
DUE TO STRIKES, ACCIDENTS, CROP FAILURES OR OTHER CAUSES BEYOND
OUR CONTROL.**

To any firms of established credit, our terms are 2% 10 days, 30 days net.

To firms who cannot or will not establish satisfactory references, cash is expected with order.

To limit disposition of our material to nurseries and plant markets, orders must be written on printed stationery or a business card must be enclosed.

All small orders (less than 100 plants) must be called for at the nursery, with the exception of specimen plants. We would greatly appreciate it, if customers would pick up their material at the nursery whenever possible; however, we have in our locality a reasonable trucker who has given us excellent service in the past. You will understand that a full trailer load will be the cheapest means of getting your order home. Less trailer loads are combined with small orders and will bring a small additional cost to the customer.

All quotations are subject to prior sales and confirmation, in accordance with our usual terms and conditions.

BOXING AND PACKING CHARGES ADDITIONAL AT COST.

JAPANESE BEETLE CERTIFICATES SUPPLIED FOR ANY SHIPMENT ON REQUEST.

**ALL RHODODENDRONS AND AZALEAS ARE GROWN IN DDT TREATED
GROUND AND CAN BE SHIPPED TO ANY PART OF THE COUNTRY WITH-
OUT DIP TREATMENT UNDER THE JAPANESE BEETLE QUARANTINE.**

ALL SHIPMENTS ARE ACCOMPANIED BY A NEW JERSEY CERTIFICATE OF HEALTH.

ALL CLAIMS MUST BE MADE WITHIN 10 DAYS AFTER RECEIPT OF GOODS.
